**323 reviews by 15 reviewers**
Notable features

By Galina Shalygina (GSOC, now works for MariaDB Corporation):

MDEV-8789 - Implement non-recursive common table expressions
MDEV-9864 - Implement recursive common table expressions
MDEV-9197 - Pushdown conditions into non-mergeable views/derived tables

By Tencent:

MDEV-11371 - Big column compressed(innodb)
MDEV-11369 - Instant add column for InnoDB
MDEV-11065 - Compressed binary log

By Tempesta:

MDEV-12894 - System-versioned tables
challenges
102 pull requests in backlog

grooverdan commented on 8 May

happy bug day to you, happy bug day to you, happy bug day dear #387, happy bug day to you.

May you be resolved before a second year passes.

7 open pull requests older than 1 year

Travis

Confuses both contributors and reviewers.
The job exceeded the maximum time limit for jobs, and has been terminated.
Intention:

Contributors need at least basic testing for their code before they submit it to us.

Reality:

Only a few contributors (may be just one?) configured Travis to build their forks.
Travis doesn’t provide sufficient coverage for reviewers to tell if the patch is good enough:

- no Windows
- no Power8
- no ARM
- reduced build configurations set
- reduced test coverage
