

# Perspective from a Board Member

Eric Herman

MariaDB Foundation

2019-11-19

# Hello

- ▶ Eric Herman
- ▶ Chairman of the Board of Directors of the MariaDB Foundation
- ▶ MySQL 2004-2010, Developer
- ▶ Booking.com 2010-2019, Principal Developer
- ▶ Joined Board of Directors in 2015
- ▶ Employed by the Foundation for Public Code since July
- ▶ Open Hardware designer
- ▶ Contributor to Perl programming language

## **Continuity and open collaboration in the MariaDB ecosystem**

- ▶ Continuity: companies come, go, merge - no problem
- ▶ Collaboration: all users and contributors, great and small
- ▶ Ecosystem: linux distros, adoption in general

# Adoption

- ▶ MariaDB users start with an application, not a database
- ▶ Many people start with Wordpress
- ▶ MariaDB is the default in many important linux distros
- ▶ Tomorrow's DB experts will be the people who scaled today's default DB

# More Adoption Work To Do

## **Making it easy for distros will continue to be key**

- ▶ Testing, with an always "Green" master?
- ▶ Easy re-build, cross-compile, Build-bot, reproducible builds?
- ▶ Tests which are easier and faster and more parallel?
- ▶ Clear release branches with better release notes?
- ▶ Can we get to calendar based releases?

# MariaDB is Special

- ▶ Real Collaborations
- ▶ Awesome work coming from MariaDB Corp
- ▶ Also very serious engineering coming from others
- ▶ That's why we're here this week

## Example: Instant ADD COLUMN

**Instant ADD COLUMN came from a brainstorm at a previous MariaDB unconference.**

- ▶ Alibaba
- ▶ MariaDB Corporation
- ▶ Tencent

The prototype was developed by Vin Chen from Tencent.

# Developers Coming Together

- ▶ Each contributor has a roadmap
- ▶ The trajectory of the server is the combination
- ▶ Share what you've been contributing recently
- ▶ Share what you plan to contribute going forward
- ▶ Look for opportunitites trade ideas with each other

# Going Forward

- ▶ Work together, learn together
- ▶ Improve ourselves as developers
- ▶ Make friends and enjoy the process
- ▶ Make the server ever better

# Thank you
